

Please do not allow cell phone use aboard planes. It is bad enough to listen to people talk on their cell phones everywhere you go. I do not want to be trapped on a plane with people talking constantly on their cell phones. I think this will cause airplane rage - similar to road rage. Flying is stressful enough without having to listen to cell phone users. I don't think it is too much to ask for people to sit on a plane for a couple of hours without talking on their cell phones. Really how much could a person have to talk about? They talk non-stop. So Please don't let them use cell phones on an airplane. If they do I will have to start driving instead of flying.
